After decades of gaming consoles, Nintendo is now looking to get into the mobile gaming space. With a small budget and less traditional controls, Nintendo wants to bring its classic titles to mobile. Nintendo's mobile strategy is very simple. Rather than develop games from scratch, the company is looking to port popular games to mobile. It first demonstrated this by releasing the popular action-puzzle game, Game & Wario. It then followed that up by bringing over the role-playing games Mario Bros., Dr. Mario, Paper Mario, and Pokémon. Nintendo is going all out with its mobile push. In June, Nintendo announced plans to bring all of its current mobile titles to the iPhone and Android. These games include WarioWare, Pokédex, Mario Kart, WarioWare: Twisted!, Dr. Mario, Mario's Picross, and more. In fact, Nintendo has even gone as far as to rework some of its classic titles to be a little more mobile-friendly. Players can expect remakes of Dr. Mario, WarioWare, Yoshi's Island, Mario Kart, and Super Smash Bros., among other games. The company is also working on a remade version of Super Mario Bros., which may be released by the end of the year. With the upcoming release of Nintendo's console, the NX, Nintendo is more likely to focus on mobile than its traditional platform. The NX could take the place of the Wii U, and could eventually lead to the creation of a handheld version of the console. If that happens, Nintendo is more likely to make a lot of its mobile games available on the NX. As of now, Nintendo is following the same strategy that it's used with mobile. It's bringing its existing console games to mobile, and it's re-imag
